

BAY STATE APPLE PARING MACHINE CO.

Manufacturers of and Wholesale Dealers in their
PATENT APPLE PARING, CORING AND SLICING MACHINE,
PATENT PEACH, POTATO OR APPLE PARER,
Patent Return Table Apple Parer,
(FOR PARING ONLY.)

— AND —

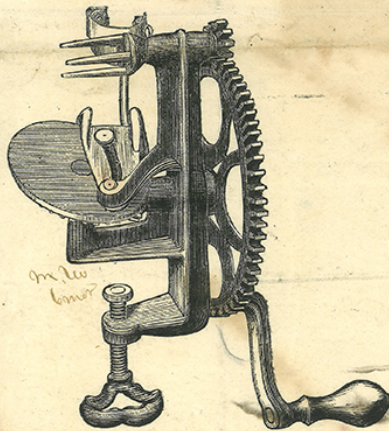

PATENT CYLINDRICAL MEAT MASHER.

PARER, CORER AND SLICER.

Our Patent Apple Paring, Coring and Slicing Machine, which does all the work at one operation by five turns of the crank, has been constantly improved, until it is now PERFECT, and we warrant it every way satisfactory. It pares only, when slicing is not desired.

Over 150,000 have already been sold,
which fact is a sufficient recommendation.

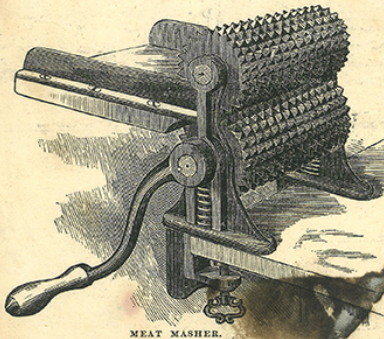

RETURN TABLE APPLE PARER.

OUR PATENT

RETURN TABLE APPLE PARER

is now offered to the public for the first time. It embraces some of the principles of former patents, but the principle of giving the knife motion around the apple, and causing its return, is ENTIRELY NEW, and a patent has been allowed upon it. It takes three turns of the crank to pare the apple and bring the knife back in place, without the use of a spring, and in the neatest and most quiet manner imaginable; no machine leaves so little paring upon the apple. We warrant it satisfactory.

Our Peach, Potato or Apple Parer, was first manufactured last year, and gave universal satisfaction, and the Manufacturers were unable to supply the demand. They are very superior for either purpose.

MEAT MASHER.

OUR PATENT CYLINDRICAL MEAT MASHER

is intended for MASHING BEEF STEAK, to make it tender for cooking, and to take the place of pounding, and produces twice the effect in one tenth the time. They are highly approved by those who are using them, and many of them have been sold. The price is within the means of all.

All the above Machines are manufactured solely by us.
ORDERS RESPECTFULLY SOLICITED.
